OBJECTIVE

Motivated 3rd-year Information Technology undergraduate specializing in **Software Engineering** and **AI/ML**, with hands-on experience building responsive user interfaces, web applications, and digital platforms. Skilled in bridging the gap between comprehensive **UI/UX design** and modern **frontend development**. Seeking a challenging role or internship to apply my technical knowledge, enhance my problem-solving skills, and contribute to dynamic software engineering projects.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frameworks: React, Next.js, Node.js, Express.js, Tailwind CSS

UI/UX & Design: Figma, Wireframing, Rapid Prototyping, User Interface Design

Databases & Cloud: MongoDB Atlas, Vercel, Railway, RESTful APIs

Tools & Platforms: Git, GitHub, Postman, Stripe API, OpenAI API, Gemini API, JWT, MetaTrader 5 (MT5)

PROJECTS

1. Trackly – Job Application Tracker

[GitHub Repo](#)

Tech Stack: React 19, TypeScript, Node.js, Express 5, MongoDB/Mongoose, Zod, JWT, Vitest

- Engineered a full-stack job pipeline manager with a 6-stage Kanban/table workflow, dynamic filtering, pagination, and six-month visual activity metrics.
- Implemented strict user-scoped CRUD authorization, Zod runtime validation, rate limiting, and an automatic interview scheduling state machine.
- Built a dual-layer data architecture supporting both an instant in-memory adapter and persistent MongoDB storage.

2. Élan Atelier – E-Commerce Platform

[GitHub Repo](#)

Tech Stack: React 19, TypeScript, Express 5, MongoDB, Zod, JWT, Supertest

- Developed an editorial clothing storefront featuring SKU/variant stock tracking, client-side persistent cart/wishlist, and a role-protected admin dashboard.
- Built a stock-validated checkout flow with server-side price recalculation, order state transitions, and real-time low-inventory alerts.
- Enforced secure customer/admin RBAC with signed JWTs, bcrypt hashing, and end-to-end API integration tests.

3. NovaCare – Appointment Booking System

[GitHub Repo](#)

Tech Stack: React 19, TypeScript, Node.js, Express 5, MongoDB, Zod, Vitest

- Designed a multi-role scheduling platform for patients, care providers, and administrators with dynamic working-hour slot calculation.
- Prevented overlapping bookings using server-side time-conflict detection and atomic unique slot keys in MongoDB.
- Created provider workflows for weekly availability management, booking approvals, and administrative service catalog control.

4. Finora – AI Expense & Budget Manager

[GitHub Repo](#)

Tech Stack: React, TypeScript, Express, MongoDB, Recharts, Zod, Vitest

- Built a personal finance tracker featuring monthly budget limits, recurring payment tracking, CSV data export, and interactive Recharts visualizations.
- Implemented the *Finora Intelligence* engine to deliver deterministic spending pace analysis, budget projections, and savings insights without exposing user data to third-party APIs.
- Enforced user-isolated data queries, strict category-type validation, and rate-limited authentication endpoints.

5. Lumina – Learning Management Platform

[GitHub Repo](#)

Tech Stack: React 19, TypeScript, Vite, Cloudflare Workers, Responsive CSS

- Built an interactive, role-aware LMS front end featuring an immersive lesson player, instant-feedback quiz modules, and personal learning dashboards.
- Designed an instructor analytics suite with weekly engagement visualizations, course status workflows, and an AI Study Coach interface.
- Engineered a Cloudflare Workers-compatible, accessible UI system with reduced-motion support, keyboard navigation, and zero runtime layout shift across mobile, tablet, and desktop.

EXPERIENCE

Full-Stack Software Engineer Intern	Aug 2026 – Present
<i>SLT-MOBITEL — Digital Platforms Division</i>	
- Assigned to full-stack software development and core IT tasks within the Digital Platforms Division. - Engage in building, updating, and maintaining modern web applications and software modules. - Follow strict enterprise information security guidelines and standard software engineering practices.	

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)	Nov. 2023 – Present
<i>BSc in Information Technology — 3rd Year, Semester 1</i>	
<i>Malabe, Sri Lanka</i>	
Ananda Sasthralaya National College	2020 – 2023
<i>Advance Level Examination</i>	
<i>Matugama, Sri Lanka</i>	

CERTIFICATIONS

Certificate in Professional English & Information Technology	2023
<i>Aquinas College of Higher Studies</i>	
Information & Communication Technology Competition	2016
<i>Zonal Education Office, Matugama</i>	
- Secured 1st Place at the Divisional Level in the Presentation Software category. - Secured 2nd Place at the Zonal Level in the Presentation Software category.	

SOFT SKILLS

- Problem Solving - Effective Communication	- Time Management - Adaptability & Quick Learning
---	---

OTHER ENGAGEMENTS

Batch Representative	2024 – Present
<i>Sri Lanka Institute of Information Technology (SLIIT)</i>	
Serve as the primary liaison between students and faculty, coordinating batch activities and representing student interests.	
Active Member	2026 – Present
<i>Rotaract Club of SLIIT</i>	
Collaborate with university peers on community service initiatives and professional development projects.	
Sports Captain	2023
<i>Ananda Sasthralaya National School, Matugama</i>	
Led school athletic teams, fostering teamwork, discipline, and competitive excellence.	

AWARDS & ACHIEVEMENTS

School Record Holder: 110m Hurdles	2022
<i>Ananda Sasthralaya National School, Matugama</i>	
Set an unbroken school athletic record, demonstrating high-level discipline, precision, and dedication to training.	
1st Runner-Up: Volleyball	2016
<i>Sri Lanka – India Tour</i>	
Represented Sri Lanka in international competition, highlighting strong teamwork, communication, and adaptability.	
3rd Place: All-Island Chess Championship	2015
Demonstrated advanced strategic thinking, foresight, and problem-solving skills at the national level.
